Re: M/035/002 – Bingham Canyon Mine
Notice of Continuing Use of Random Fill Borrow Areas
Supplemental Information

Dear Ms. Dean:

Kennecott submitted to the Division September 29, 2009 a notice of continued utilization of random fill borrow areas previously identified in the Magna Concentrator Complex – Arthur Concentrator Complex reclamation areas. Material removed will be bank run material with no blasting, crushing or screening.

With this supplement, Kennecott understands and agrees that this area will require post-utilization reclamation pursuant to the provisions of R647-4-111 Reclamation Practices as applicable. In addition, KUC will provide limited interim cover seeding (primarily barley) and limited shaping for the site except for small active extraction faces that are utilized on a more regular basis.

Please contact me or Glenn Eurick at 801-204.2113 should you have any questions concerning this submittal.

Sincerely,

Chris Kaiser
